OTHER:

Development and supervision of training provided within BPAS to FSRH Community Sexual and Reproductive Health or RCOG trainees needing to abortion care modules or to external consultants or trainees needing to supplement existing skills.

Development and supervision of training for consultants interested in expanding their surgical skills, often in manual vacuum aspiration or advancing their gestational age limit for dilatation and evacuation.

BPAS

Responsible for:

- Identifying clinical training needs at the individual level and organisation wide (e.g., in response to new clinical developments, when engaging new surgeons, or for risk management).
- Developing and delivering in-house clinical training programmes where appropriate and monitor course effectiveness with Learning and Development Manager.
- Work with Learning and Development Department to source and review external courses.
- Coordinate medical student and trainee rotations at BPAS.

Course development and delivery:

CONSCIOUS SEDATION theory course and competency training. Designed to skill BPAS clinicians to deliver surgical abortion with operator delivered sedation using midazolam and fentanyl.

CONTRACEPTION: SKILLS FOR PRACTITIONERS (previously Fundamentals for Practitioners). Co-developed in-house course for BPAS clinicians to support delivery of full range of reversible contraceptive methods peri-abortion.

SURGICAL SKILLS TRAINING. Provided on an as needed basis to new or established BPAS doctors needing to acquire new skills (common examples are vacuum aspiration under local

anaesthetic and dilatation and evacuation), increase gestational age limit, or where a risk management issue has been identified. In addition, I oversee a group of trainers within the organisation, and develop training plans and competency frameworks.
